

# Template: Cannabis Seeds Packaging Checklist for International Shipping

Generated: 2/4/2026

Based on Article: "Best Practices for Packaging Cannabis Seeds for International Shipping"  
Website: <https://theseedconnect.com>

A practical checklist for packaging cannabis seeds to ensure safe and compliant international shipping.

## Checklist Items:

### 1. Gather Required Materials

Collect inner seed pouches, desiccants, tamper-evident bags, cushioning materials, and outer mailers to prepare for packaging.

Reference Section: What You'll Need (Prerequisites)

### 2. Check Legal Requirements

Confirm the legality of shipping cannabis seeds to the destination country and identify any required permits or documentation.

Reference Section: What You'll Need (Prerequisites)

### 3. Condition Seeds

Equilibrate seeds to a stable relative humidity of ~6–8% using desiccant chambers or controlled humidity cabinets. Ensure no visible clumping and a weight variance of less than 1%.

Reference Section: Step-by-Step Packaging Process

### 4. Seal Seeds Properly

Transfer conditioned seeds to heat-seal pouches or child-resistant jars, add a calibrated desiccant packet, and seal tightly to prevent contamination.

Reference Section: Step-by-Step Packaging Process

### 5. Use Discreet Outer Packaging

Place the sealed pouches into discreet padded mailers to ensure the contents are not readily identifiable during transit.

Reference Section: Packaging items by function

### 6. Prepare Documentation

Complete all necessary documentation including phytosanitary certificates, commercial invoices, and customs forms based on the destination requirements.

Reference Section: What You'll Need (Prerequisites)

### 7. Label Sensibly

Ensure labels do not disclose the contents explicitly. Use terms like 'seeds - non-food, non-viable' if applicable.

Reference Section: Labeling Sensibly: What to Say and What to Avoid

### 8. Conduct a Final Quality Check

Review the sealed packages and documentation to ensure everything is in order before dispatching, to avoid delays or issues.
