Based on Article: "Integrating SEO Tools with Your Blogging Platform: A Step-by-Step Guide"

Website: <https://scaleblogger.com>

A practical checklist for integrating SEO tools with your blogging platform to enhance performance and automate workflows.

Checklist Items:

- ☐ **1. Confirm Admin Access to CMS**
Ensure you have admin-level access to your Content Management System (CMS) for plugin installations and configuration changes.
Reference Section: Prerequisites and What You'll Need
- ☐ **2. Verify Google Search Console Access**
Create or confirm ownership of Google Search Console account to monitor indexing and performance metrics of your site.
Reference Section: Prerequisites and What You'll Need
- ☐ **3. Install SEO Plugin**
Choose and install an SEO plugin such as Yoast or RankMath, connecting it to both Google Search Console and Google Analytics.
Reference Section: Prerequisites and What You'll Need
- ☐ **4. Conduct a Site Backup**
Create a full backup of your site (files and database) and store it offsite to ensure recovery options before making changes.
Reference Section: Prerequisites and What You'll Need
- ☐ **5. Run an SEO Audit**
Perform a comprehensive audit using Google Search Console and Analytics to establish a performance baseline, noting issues like broken links or duplicate metadata.
Reference Section: Audit Your Current SEO Setup
- ☐ **6. Crawl Your Site**
Utilize a crawling tool like Screaming Frog to identify technical issues such as 404 errors or redirect chains that need fixing.
Reference Section: Audit Your Current SEO Setup
- ☐ **7. Analyze Indexing and Performance Data**
Export index coverage and performance data from Google Search Console to track clicks, impressions, and CTR, identifying opportunities for improvement.
Reference Section: Audit Your Current SEO Setup

☐ **8. Optimize Performance Metrics**

Review and enhance mobile usability and page loading speed using Lighthouse; prioritize pages with the highest traffic for maximum impact.

Reference Section: Audit Your Current SEO Setup

☐ **9. Implement Automation Tools**

Set up API keys for any third-party SEO automation tools to facilitate ongoing optimization and efficiency in SEO management.

Reference Section: Prerequisites and What You'll Need

☐ **10. Monitor and Validate Changes**

After completing integrations, ensure to validate and monitor all changes for both functionality and improvements in traffic and engagement metrics.

Reference Section: Validate, Test, and Monitor Post-Integration
